## CLAIMS

1. A resin composition comprising:

30 to 95 parts by weight of a biodegradable polylactic acid resin (A), and

70 to 5 parts by weight of a polyalkylene carbonate
(B) of the following formula (I), providing that the sum
of components (A) and (B) is 100 parts by weight, and
satisfying that a pressed film of 0.1 mm thickness

formed therefrom has a haze of 40% or less,

(I)

wherein R represents at least one group selected from the group consisting of an ethylene group, a propylene group and a group of the general formula:

$$-(R^1-O-R^2)_p$$

(II)

SF-780PCT

15

(wherein each of  $R^1$  and  $R^2$  independently represents an alkylene group having 2 to 6 carbon atoms; and p is an integer of 1 to 15);

m is an integer of 1 to 15; and n is an integer of 3 to 15,000.

- 2. The resin composition as claimed in claim 1, comprising:  $40 \; to \; 90 \; parts \; by \; weight \; of \; the \; biodegradable \; polylactic \; acid \; resin \; (A) \; , \; and \;$
- 60 to 10 parts by weight of the polyalkylene carbonate
  (B), providing that the sum of components (A) and (B) is
  100 parts by weight, and

satisfying that a pressed film of 0.1 mm thickness formed therefrom has a haze of 40% or less.

- 3. The resin composition as claimed in claim 1 or 2, wherein the polyalkylene carbonate (B) is polyethylene carbonate.
- 4. The resin composition as claimed in any of claims 1 to 3, further satisfying that a pressed film of 0.5 mm thickness formed therefrom, has a Young's modulus at  $23^{\circ}$ C of 2500 MPa or less.

SF-780PCT

5

- 5. The resin composition as claimed in any of claims 1 to 4 further satisfying that a pressed film of 0.1 mm thickness formed therefrom, has a carbon dioxide permeability coefficient at  $25^{\circ}\text{C}$  of 85 cc mm/m<sup>2</sup> day atm or less.
- A molded article made of the resin composition claimed in any of claims 1 to 5.
- 7. The molded article as claimed in claim 6, selected from the group consisting of a film, an oriented film, an injection-molded product, a blow-molded product, a laminate, a tape, a nonwoven fabric and a yarn.
